

Yatharth Sharma

AI-Focused Full-Stack Developer

Faridabad, Haryana, India | yatharthsharma1309@gmail.com | linkedin.com/in/yatharthsharma-ai | github.com/YatharthSharma1309

PROFESSIONAL SUMMARY

Software engineer with production experience shipping React/TypeScript UIs and REST APIs. I own features end to end: LLM integrations, RAG pipelines, document ingestion, and polished, accessible interfaces with strong attention to performance and craft. Seeking full-time software engineering roles.

TECHNICAL SKILLS

Frontend:

- React
- TypeScript
- Next.js
- Tailwind CSS
- Styled Components
- Redux
- Context API
- Accessibility

Backend:

- Node.js
- Express
- FastAPI
- Prisma
- PostgreSQL
- REST APIs
- JWT auth
- OAuth

AI & LLM:

- OpenRouter
- RAG pipelines
- Semantic search
- Streaming APIs
- Document ingestion

Building depth in:

- OCR
- PDF/DOCX parsing
- SQL optimization
- Schema design
- CI/CD
- UI/UX design

EXPERIENCE

Software Engineer Trainee | Whilter.AI

Dec 2025 - Jun 2026 | Gurugram, Haryana

- Contributed to a production AI product stack - shipping React and TypeScript UI features, reusable component patterns, and interface polish in a fast-moving engineering environment.
- Built and maintained REST endpoints on the backend, including request validation, service integration, and API contracts that supported live product workflows.
- Integrated third-party services and LLM-powered capabilities into application flows - connecting external APIs to front-end experiences with clear error handling and predictable behavior.
- Owned full-stack feature slices end to end: UI states, backend routes, data handling, and hand-off between layers so features could move from idea to production with fewer dependencies.

Data Analyst Intern | Ernst & Young Global Consulting Services

Feb 2025 - May 2025 | Gurugram, Haryana

- Supported consulting and reporting workstreams by working with multi-source datasets pulled from different business systems and formats.
- Cleaned, validated, and preprocessed data to improve accuracy before analysis - catching inconsistencies, standardizing fields, and preparing datasets stakeholders could trust.
- Helped turn raw data into structured reporting outputs that highlighted trends, exceptions, and business-relevant signals for review.
- Collaborated in a professional services setting where attention to detail, documentation, and clear deliverables mattered as much as the analysis itself.

Data Analyst | Honeywell

Jan 2023

- Analyzed customer feedback data to assess product and service performance - identifying recurring themes, pain points, and areas where experience could improve.
- Supported cross-functional analytical work by helping shape dashboards, summaries, and research inputs used in product and business discussions.
- Contributed to market and customer insight work that connected qualitative feedback with structured reporting for easier decision-making.
- Built early experience turning business questions into data-backed observations - the analytical foundation that later carried into engineering and product-focused roles.

Web Development Intern | Arctic Innovage Pvt. Ltd.

Jul 2022 - Sep 2022

- Built and maintained responsive marketing and content pages with HTML, CSS, and JavaScript - focusing on layout, readability, and mobile-friendly presentation.
- Improved page structure and UI flow so content was easier to scan, navigate, and interact with across screen sizes.
- Used analytics and performance observations to refine UX choices - reducing friction in key user paths and keeping pages lightweight where possible.
- Gained hands-on experience translating design intent into front-end implementation, which became the base for later React, TypeScript, and full-stack work.

SELECTED PROJECTS

AI Sales Assistant CRM

Multi-tenant B2B CRM with OAuth integrations and AI-drafted follow-ups.

RecruitAI - Smart Recruitment Assistant

Recruiter dashboard for resume screening and candidate scoring.

IntelliRAG

Production RAG platform for contextual querying and semantic search.

EduTech - AI Document Processing

Early-phase exploration of AI-powered educational document processing - OCR-based Q&A extraction from PDFs, classification, and Excel-ready output.

TermLens

Legal-tech SaaS that explains Terms, Privacy, and Refund policies in plain English with risk scores and clause flags.

Arena Deathmatch

Browser-based 3D first-person arena shooter - waves, dual weapons, minimap, difficulty tiers, and persistent high scores.

EDUCATION

Master of Computer Applications (MCA), Data Analytics

Birla Institute of Technology, Mesra | Aug 2023 - Jul 2025

Bachelor of Computer Applications (BCA)

Manav Rachna University, Faridabad | 2020 - 2023

CERTIFICATIONS & ACHIEVEMENTS

- Microsoft Certified: Azure AI Fundamentals
- Microsoft Certified: Azure Data Fundamentals
- Microsoft Certified: Azure Fundamentals
- AWS S3 Project (Coursera)

- Data Encryption using AWS KMS (UST)
- Cloud Architecture: Core Concepts
- Cloud Architecture: Advanced Concepts
- Excellent Contributor Award - Alibaba Cloud Low Code Development Contest 2022
- Devtown Backend Web Development Bootcamp
- Python & Data Science Essentials Bootcamp
- Python and Machine Learning Bootcamp
- Udemy - Agentic Engineer Course

LANGUAGES

English (Fluent), Hindi (Native), French (Beginner)
