Backend

AI & LLM

Building depth in

EDUCATION

Master of Computer Applications (MCA), Data Analytics

Birla Institute of Technology, Mesra

Aug 2023 — Jul 2025

Bachelor of Computer Applications (BCA)

Manav Rachna University, Faridabad

2020 — 2023

CERTIFICATIONS

- Microsoft Certified: Azure AI Fundamentals

PROFESSIONAL SUMMARY

AI-focused full-stack developer with production experience at Whilter.AI (Dec 2025 — Jun 2026) — React/TypeScript UIs, REST APIs, and LLM integrations. Also delivered multi-tenant CRM, recruiter AI tooling, and end-to-end RAG and document ingestion pipelines. Open to full-time engineering roles — India and remote-friendly.

EXPERIENCE

Whilter.AI

Software Engineer Trainee · Gurugram, Haryana

Dec 2025 — Jun 2026

- Contributed to a production AI product stack — shipped React and TypeScript UI features, reusable component patterns, and interface polish in a fast-moving engineering environment.
- Built and maintained REST endpoints on the backend, including request validation, service integration, and API contracts that supported live product workflows.
- Integrated third-party services and LLM-powered capabilities into application flows — connecting external APIs to front-end experiences with clear error handling and predictable behavior.
- Owned full-stack feature slices end to end: UI states, backend routes, data handling, and hand-off between layers so features could move from idea to production with fewer dependencies.

Ernst & Young Global Consulting Services

Data Analyst Intern · Gurugram, Haryana

Feb 2025 — May 2025

- Supported consulting and reporting workstreams by working with multi-source datasets pulled from different business systems and formats.
- Cleaned, validated, and preprocessed data to improve accuracy before analysis — catching inconsistencies, standardizing fields, and preparing datasets stakeholders could trust.
- Helped turn raw data into structured reporting outputs that highlighted trends, exceptions, and business-relevant signals for review.
- Collaborated in a professional services setting where attention to detail, documentation, and clear deliverables mattered as much as the analysis itself.

Faridabad, Haryana · +91 8802518567 · yatharthsharma1309@gmail.com · linkedin.com/in/yatharthsharma-ai · github.com/YatharthSharma1309

- Microsoft Certified: Azure Data Fundamentals
- Microsoft Certified: Azure Fundamentals
- AWS S3 Project (Coursera)
- Data Encryption using AWS KMS (UST)
- Cloud Architecture: Core Concepts
- Cloud Architecture: Advanced Concepts
- Excellent Contributor Award — Alibaba Cloud Low Code Development Contest 2022
- Devtown Backend Web Development Bootcamp
- Python & Data Science Essentials Bootcamp
- Python and Machine Learning Bootcamp
- Udemy — Agentic Engineer Course

LANGUAGES

English (Fluent) · Hindi (Native) · French (Beginner)

Honeywell

Data Analyst

Jan 2023

- Analyzed customer feedback data to assess product and service performance — identifying recurring themes, pain points, and areas where experience could improve.
- Supported cross-functional analytical work by helping shape dashboards, summaries, and research inputs used in product and business discussions.
- Contributed to market and customer insight work that connected qualitative feedback with structured reporting for easier decision-making.
- Built early experience turning business questions into data-backed observations — the analytical foundation that later carried into engineering and product-focused roles.

Arctic Innovage Pvt. Ltd.

Web Development Intern

Jul 2022 — Sep 2022

- Built and maintained responsive marketing and content pages with HTML, CSS, and JavaScript — focusing on layout, readability, and mobile-friendly presentation.
- Improved page structure and UI flow so content was easier to scan, navigate, and interact with across screen sizes.
- Used analytics and performance observations to refine UX choices — reducing friction in key user paths and keeping pages lightweight where possible.
- Gained hands-on experience translating design intent into front-end implementation, which became the base for later React, TypeScript, and full-stack work.

PROJECTS

SupportAI — Customer Support Platform

Next.js · TypeScript · Prisma · PostgreSQL · Clerk · OpenRouter · RAG

IN PROGRESS

- Support teams need grounded AI answers, agent handoff, and measurable deflection — without bolting together separate chat, ticketing, and analytics tools.
- Shipped a full support platform: knowledge-base ingestion (PDF/DOCX/TXT/MD), streaming RAG with citations, agent inbox, ticket copilot, embeddable widget, help center, and deflection analytics — multi-tenant with Clerk orgs.

Yatharth Sharma

AI-Focused Full-Stack Developer

Faridabad, Haryana · +91 8802518567 · yatharthsharma1309@gmail.com · linkedin.com/in/yatharthsharma-ai · github.com/YatharthSharma1309

RecruitAI — Smart Recruitment Assistant

IN PROGRESS

Next.js · Prisma · PostgreSQL · OpenRouter · PDF parsing

- Manual resume screening is slow and inconsistent when matching candidates to job requirements.
- Built a dashboard that parses PDF/DOCX resumes, scores candidates against job descriptions, surfaces skill gaps, and generates interview questions.

AI Sales Assistant CRM

IN PROGRESS

React · Express · Prisma · PostgreSQL · JWT · OAuth

- Sales teams juggle leads across tools without a unified pipeline or AI-assisted follow-up workflow.
- Shipped a multi-tenant CRM with drag-and-drop pipeline, activity timelines, lead scoring, and OAuth sync for HubSpot, Salesforce, Google Calendar, and Gmail.

IntelliRAG

RAG · Embeddings · Semantic search · LLM APIs · Document ingestion

- Organisations need reliable semantic search over proprietary documents without exposing source code.
- Delivered end-to-end RAG — document ingestion, chunking, embeddings, retrieval, and LLM response generation — as private org infrastructure.

EduTech — AI Document Processing

- Early-phase exploration of AI-powered educational document processing — OCR-based Q&A extraction from PDFs, classification, and Excel-ready output.
- Official organisation repo; source is private and not publicly shareable.

TermLens

- Legal-tech SaaS (parked for job search) — explains Terms, Privacy, and Refund policies in plain English with risk scores.
- FastAPI backend, browser extension, desktop app, Razorpay billing.
- Private repo; interview narrative only.

Arena Deathmatch

- Browser-based 3D first-person arena shooter — waves, dual weapons, minimap, difficulty tiers, and persistent high scores.
- Pure HTML/CSS/JS, no install required.
